

# Artificial Intelligence Decision Making in Game Design

---

PAUL YOO

---

# AI Comparison

---

Basic AI

Complex

# Decision Tree

A decision tree can be implemented as if-then-else statements or as a tree data structure.

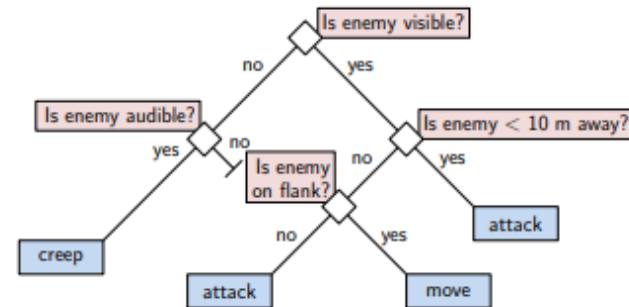

Fig. 1: A decision-tree for a combatant agent.

# Finite State Machine

A finite state machine can be implemented using a two-dimensional array.

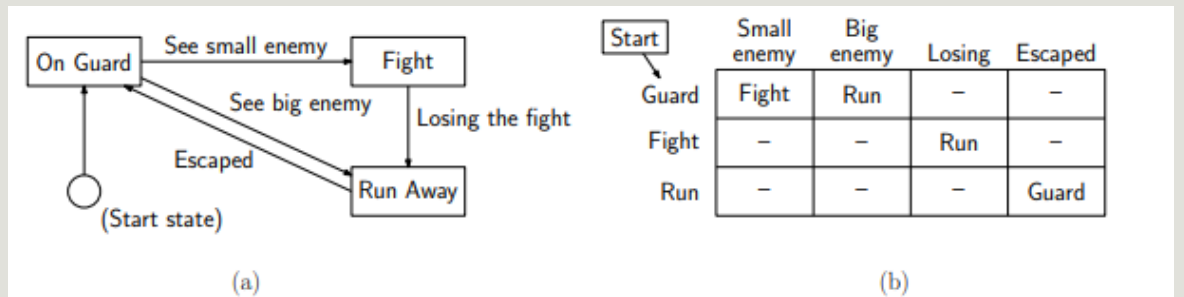

Fig. 3: A simple state machine for a warrior bot.

# Why not implement the most advanced AI?

---

- Statt reported that “The Google-owned AI lab’s more sophisticated software, still called AlphaStar, is now grandmaster level in the real-time strategy game, capable of besting 99.8 percent of all human players in competition.”
- Many users would have a negative experience playing against such a difficult opponent.

## AlphaStar

Computer program ⓘ

AlphaStar is a computer program by DeepMind that plays the video game StarCraft II. It was unveiled to the public by name in January 2019. In a significant milestone for artificial intelligence, AlphaStar attained Grandmaster status in August 2019. [Wikipedia](#)

**Developer:** [DeepMind](#)
